

Ping pong ladder

**\*\*Ya'll think we can use the same app (like same website) for a potential 2K/Fifa ladder?\*\***

- The features
- Fire emoji (5 wins in a row)
- 

### **Features**

Should have:

- Ranking system
- **Whoever beats a guy switches spots with him**
  - Might be some additional rules that differ from this after I finish codifying the rules
- Ability to challenge on the app
  - You can click on other mans name and challenge him
    - Maybe sends him email/text notification
    -
- Auto updates (so has to be connected to a live database)
- Have to have a profile for each user
- Wins and losses must be kept track of for each profile
- Must have an admin account to add/remove users
- Enter a win/loss result (same outcome agreed upon by both users)
- If they say diff---involve admin, nullify, pick winner options

### **Design**

#### **Technical:**

- Frontend: React, JavaScript
- Backend: Python (Flask)
- Database: SQLite (maybe firebase)
- Deployment:
